

Our company has tools that can aid in this crisis
So we are putting profits aside for these services
to help our Hotel Industry via a **FREE** initiative to

PROTECT

Hotel Employees & Guests

**CREATING
REVOLUTIONS**

Letter from our Founder

Dear Hotel Industry,

Today we face a global crisis with no cure.

But this pandemic can be reduced and even controlled, by 2 things that unanimously the Center for Disease Control, National Institutes of Health, and the World Health Organization all agree on.

Frequent and Consistent sanitization of Hands and Surfaces.

Sounds so simple, yet with the 24/7 constant motion of a Hotel, there are limits on how consistent and vigilant Hotel Employees can be.

We want to help, and we will not take advantage of people in a crisis. Therefore one of our services from our Multi-Patented Platform, specifically designed to help reduce the spread of the Coronavirus (Covid-19), will be **FREE** to all Hotels through 2020, minus our cost of shipping/handling/chips.

We do this because it is our Human Responsibility to help when in a crisis.

We wish your Hotel Families good health,

Einar Rosenberg

CIO and Founder
Creating Revolutions

Hand Sanitizer is the
1st line of Defense
against Coronavirus.

But it's useless if that
dispenser is **EMPTY**.

How can you
consistently Know
it is being
Checked & Refilled?

The Touch & Discover platform is the first smart system that lets you optimize your existing employees, to make sure that Hand Sanitizer Dispensers are continuously Refilled, while not creating any major disruptions in current processes.

Specifications

- 2 in X 2 in X 0.1 in
- Smart **NFC** Chip Integration
- Multi-Year Lifespan with Normal Usage
- Cloud Controlled Intelligence
- No Power Needed
- No Network Connection Needed
- Uses Multi-Patented TND Technology
- Powered by **ELROY AI** Assistive Intelligence

How does it work?

Step 1

Your Hotel's existing Roving Employees such as Security, pass by and report the Dispensers current volume level every 1 hour, or whatever Manager Time Rule amount that Management defines.

To confirm this, the Roving Employee will tap their Mobile Device to the NFC Chip on that specific Dispenser, within the Manager defined Time Rule period, and select on the screen if that Dispensers needs a Refill or not.

If the Roving Employee does not arrive within the time period that management has defined, then 1 second past, management is instantly Alerted on their Phone, Tablet or Computer.

Creating Real Accountability

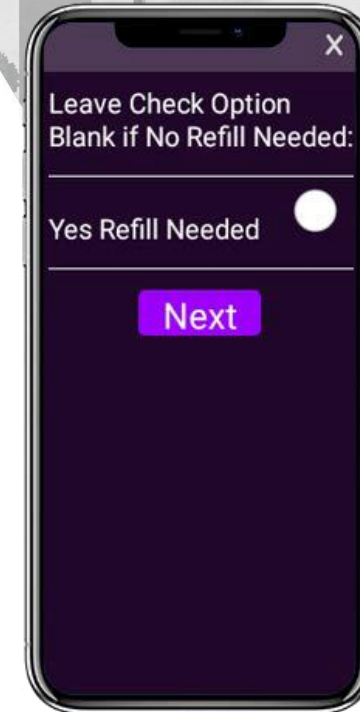

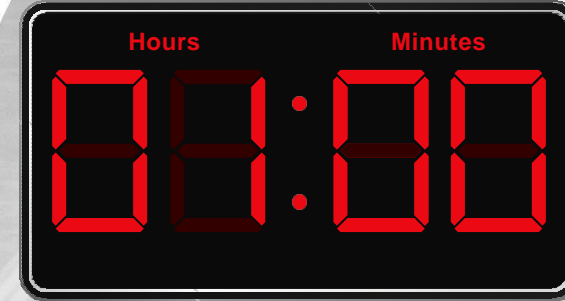

How does it work?

Step 2a – No Refill Needed

If NO Refill is Needed, then they simply leave the choice BLANK and press the Next button.

Then the Manager defined Time Rule begins counting down again for the Roving Employee.

Roving Employee

How does it work?

Step 2b – Refill Needed

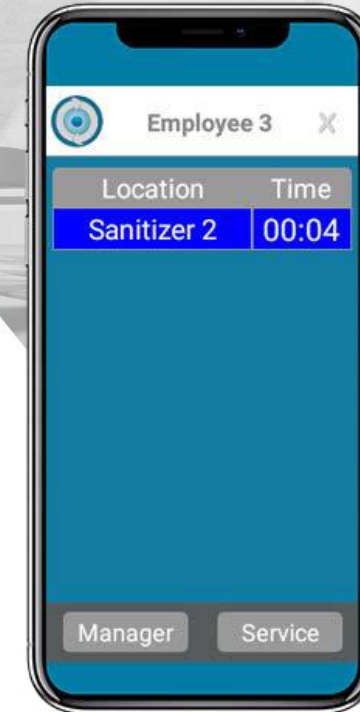

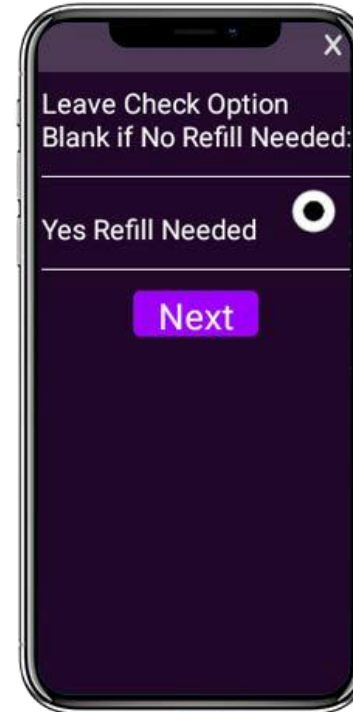

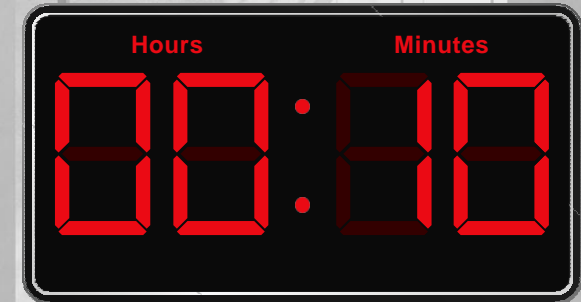

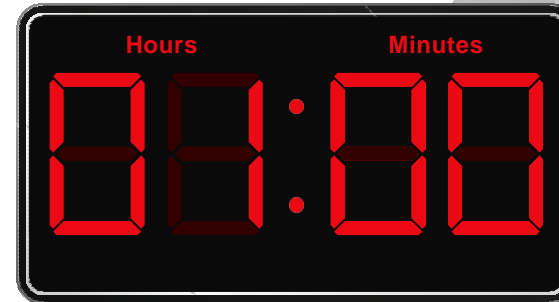

If a Refill is required, they select the option “Yes Refill Needed” and then press the Next button.

The Manager defined Time Rule begins counting down again for the Roving Employee.

At that same moment, the Refill Employee from Housekeeping or Maintenance, is instantly informed on their Mobile Device. And a separate Manager defined Time Rule begins for the Refill Employee.

If the Refill Employee does not Refill the specific Dispenser within the Manager defined Time rule for Refilling Dispensers, then Management is instantly Alerted on their Phone, Tablet or Computer.

Creating Real Accountability.
